NOTES & NEWS

Range Extension

for Columbella sonsonatensis Morch, 1860

BY

DOT MYHRE

10638 Ledeen Drive, Lake View Terrace California 91342

ON DECEMBER 27, 1970, I found two specimens of Columbella sonsonatensis Mörch, 1860 in some coralline algae attached to rocks at Saladita Cove, Sonora, Mexico. In Keen, 1958, this species is reported as Pyrene lucasana (Dall, 1916) with a range of "the southern part of the Gulf of California to Panama;" in Keen 1966 (p. 25) this name is shown to be a synonym of the earlier taxon by Mörch. The specimens were submitted to Dr. George E. Radwin of the San Diego Museum of Natural History, who kindly confirmed the identification.

The record of the specimens from Saladita Cove (near Guaymas) thus extends the known range of the species northward to Guaymas, Sonora, Mexico.

ACKNOWLEDGMENTS

I wish to thank Mrs. Faye B. Howard for calling my attention to the synonymy of this species and Dr. George E. Radwin for his assistance.

General Notices

REGARDING POSTAL SERVICE

While increases in postal charges were anticipated, the actual amount involved could not be ascertained until 4 days before the effective date. Thus, we have been unable to adjust our membership dues and subscription rates to cover these increases. Effective immediately, we must also raise our handling charges for backissues and other materials. Further, we will not acknowledge the receipt of manuscripts, unless an addressed envelope with the necessary postage is enclosed.

We must call the attention of our Members and Subscribers to the fact that we mail our journal on the date stated on the cover of a particular issue. After we have delivered the journal to the Post Office, our control ends. Delays in delivery seem to become more and more common. Needless to say that we regret this very much; we had hoped that when the salaries of the Postal Workers were increased, the service would improve. However, this seems not to be the case. If it is any consolation to our readers, we might mention that we have had some rather unpleasant experiences ourselves: an Air Mail Special Delivery letter to Los Angeles took 2 weeks!

In view of the ever increasing difficulties in the postal service, it is essential that members and subscribers not only give us prompt and early notice of address changes, but that proper arrangement for forwarding of our journal be made with the local post office (at the old address). We are not able to replace lost copies free of charge but must charge single copy rates. There will, of course, be only the usual charge of \$1.00 for re-forwarding a copy IF it has been returned by the post office to us. We also must urge our members and subscribers to place written complaints with the U.S. Post Office Department in case of loss, as every copy of our journal carries our guarantee for return postage. Thus, destruction of a copy of our journal by postal employees constitutes gross negligence and the person concerned deserves an official reprimand, at least.

Moving?

If your address is changed it will be important to notify us of the new address at least six weeks before the effective date, and not less than six weeks before our
